GDT Offline PWA User Guide

Table of Contents

iOS - Safari 2

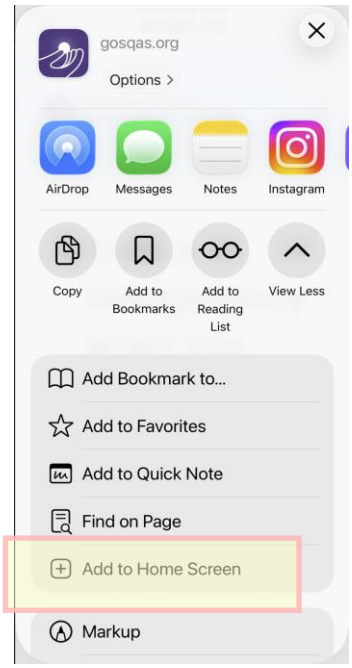
Android - Firefox 4

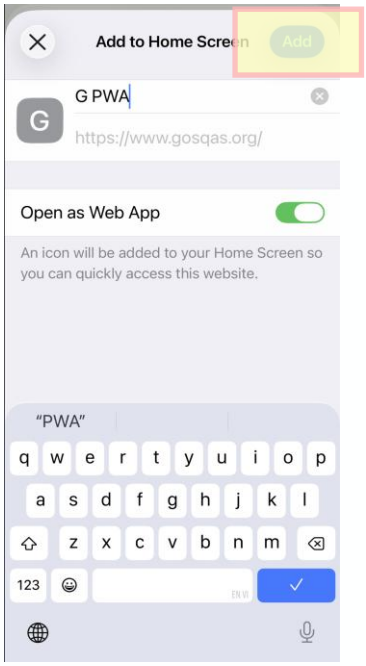
Android - Chrome 5

iOS with Safari

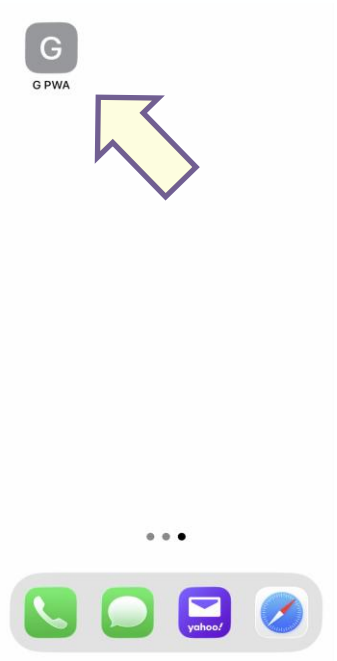
1. Navigate to https://gosqas.org using the Safari browser. Select the highlighted icon to bring up the download option. Scroll down until the ‘Add to Home Screen’ option appears.

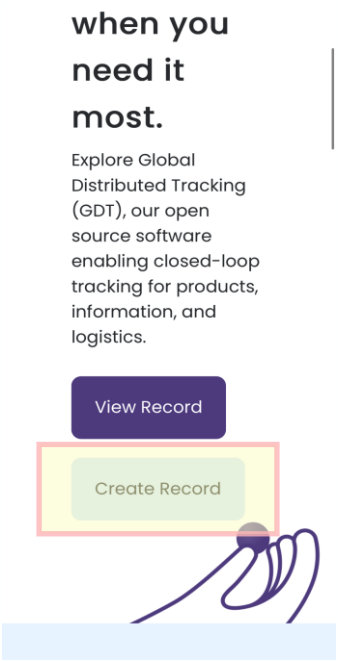
2. Select ‘Add to Home Screen’. A new screen will display with a default name that is customizable. Select the ‘Add’ button when done.





3. The newly created GOSQAS progressive web application (PWA) icon will appear in the home screen. Open that and select ‘Create Record’ or navigate to any link on the website to start the offline caching process. The caching process takes about a second or two to complete.

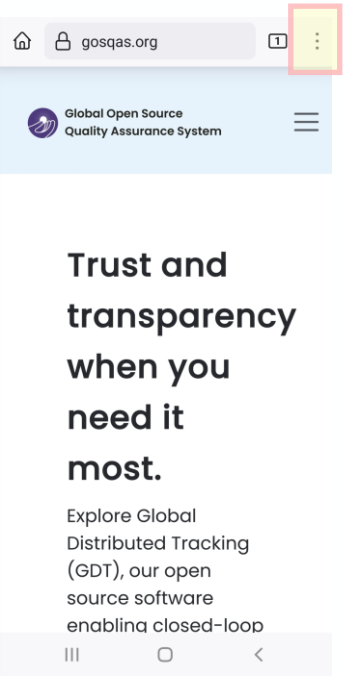


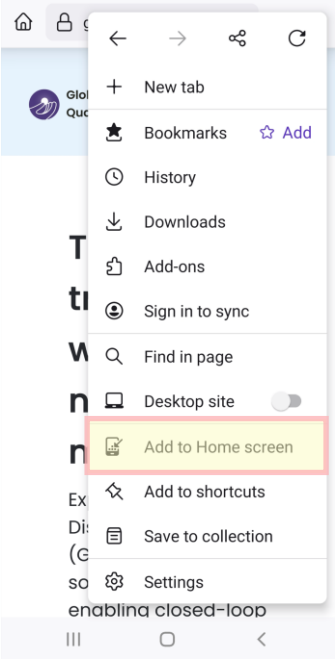


4. To test offline capability, close the PWA and turn on airplane mode. Double check to make sure that WIFI is turned off in case it stays on in airplane mode. Open the web app and the website should appear as if you are online.

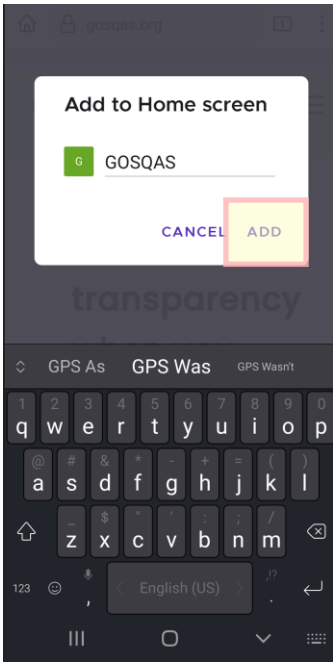
Android with Firefox

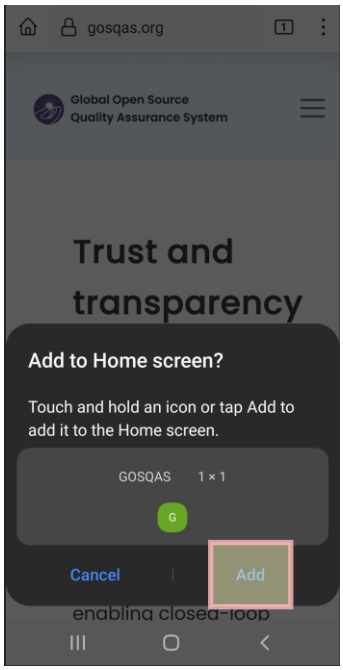
1. Navigate to https://gosqas.org using the Firefox browser. Select the three vertical dots in the top right corner to bring up the browser options. Select ‘Add to Home screen’.





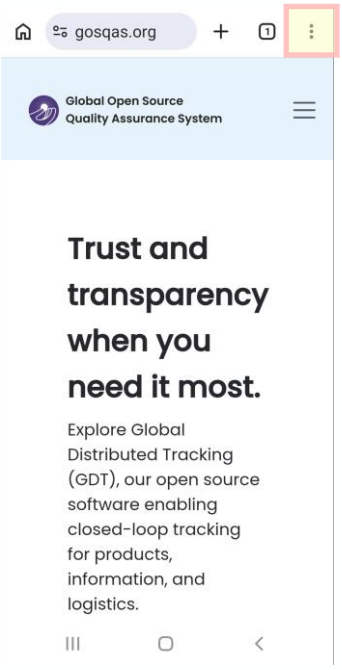
2. Select ‘Add’ after custom name input or use the provided default. Select ‘Add’ again to confirm. A new icon will be in your phone’s home screen. To test offline mode capability, turn on airplane mode. Make sure WIFI is turned off and open the web app by selecting the newly created icon in the home screen. Open the web app and the website should appear as if you are online.

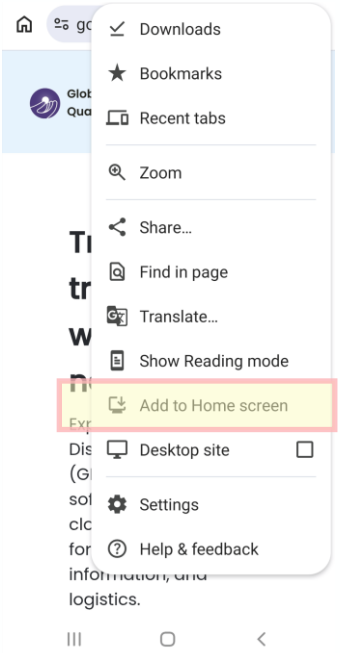


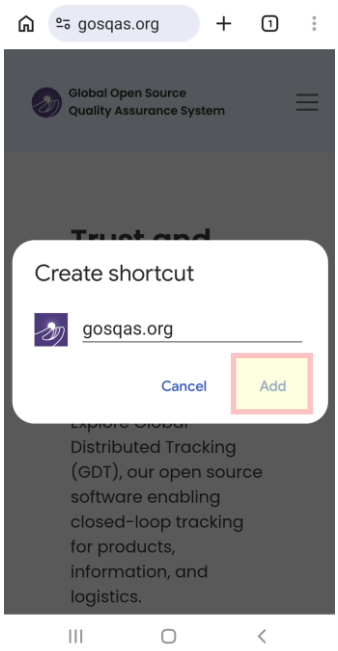


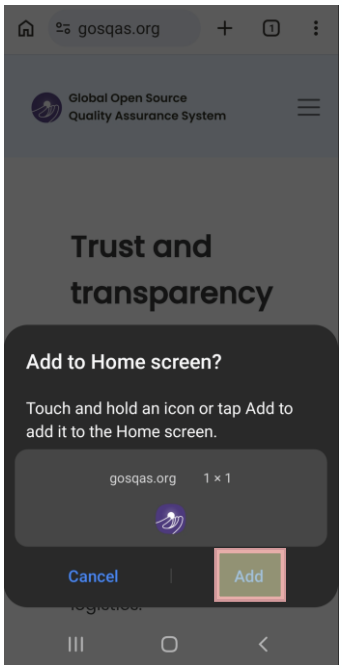
Android with Chrome

1. Navigate to https://gosqas.org on the Chrome browser. Select the three vertical dots in the top right corner. Scroll down to find the ‘Add to Home screen’ option.









2. Type in desired custom name or use the provided default. Select ‘Add’ and on the next screen, select ‘Add’ again to confirm the process. To test offline mode capability, turn on airplane mode. Make sure WIFI is turned off and open the web app by selecting the newly created icon in the home screen. Open the web app and the website should appear as if you are online.
